

To: TEDCOR

First of all I would like to thank TEDCOR for ~~the~~ the opportunity ~~to~~ gave me.

My background: I am one of the people who's coming from disadvantage community and I ~~was~~ ^{was} unemployed for a long time before, I join TEDCOR as a Community Contractor when I saw an Ad on the Newspaper.

① Currently I feel empowered because I learn how to run a business through the courses TEDCOR offered us as Community Contractors.

② Through this opportunity I managed to employ other people to fight unemployment which is a big issue in our community.

③ Through this opportunity, now there is an interaction between us and community at large by attending community meetings with them, sharing ideas with them so that we can make our townships a better place to live in.

(d) As a black lady, I feel empowered because this opportunity ~~is~~^{was} not available for women before.

Through the Educational Opportunities that are given to us, I see the light at ~~end~~ the end of the tunnel, every body feel to be the part of TEDCOR.

(e) So far I have learned a lot, so much that I can take a challenge on my own; I know how business plan is done, what are the requirements of the bank to get a finance to do a business.

(e) Always there is a room of improvement I think even at TEDCOR is like that.

(i) Transparency is needed especially in the finances.

(ii) When coming to contracts, we should be offered opportunity to question some of the clauses.

In Conclusion: Generally TEB can
did a good job by empowering the
people whose from disadvantage
background, where affirmative action,
black empowerment is on top of
the agenda in the country.

As much as I have learn through this
business, I am confident that I can
stand on my own -
